### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-7, 9-11, 17, 18 and 21 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Dickhudt et al., US-4257429. Note the groove 15, which is being read as the “channel-like recess”, has fingers 16 extending into the channel that grab the lead body.

### ***Claim Rejections - 35 USC § 103***

Claims 4 and 8 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Dickhudt et al. Dickhudt et al. discloses the invention substantially as claimed. Regarding Claim 7, the stylet is said to be “secured within the knob 11 during the molding process or may be otherwise secured”. This latter option would appear to allow for detachable coupling of the stylet to the handle, but even if not, it is common in the art to make the stylet detachable from the handle mechanism to permit, and to modify the Dickhudt et al. device to incorporated the detachable function would have amounted to an obvious modification in order to permit use of multiple stylets when different prebent configurations are necessary to reach remote and tortuous path locations within the body.
